

Coming to Your Senses

Jaimen McMillan
and Jane Swain

February 10-14, 2010

Spacial Dynamics Institute
10 N. Main St
Mechanicville, New York 12118

Never before has a growing child been exposed to as much sensory input. Never before have children been able to make less sense of it! More and more children, youth, and adults simply tune out, or turn off, adopting a frighteningly vacant "ain't nobody home" stare. Others imitate this bombardment of stimulation by bouncing off the walls, acting out with nonsensical behavior, or even exploding senselessly at socially inappropriate times. In this course, we will study the phenomenon of sense perception, and the developmental challenges that children face when they are not able to integrate sensory impressions that they receive.

There is hope! We can develop a new understanding and use of the senses themselves. We can train ourselves to use our senses to perceive in ways that enhance interest, interaction, and exchange. In fact, building on the basic five senses, and the seven senses that Rudolf Steiner supplemented, we will dare to add another three senses, adding up to 15 senses in all. The point being, that by using the entire spectrum of senses that we have available to us, we may just be able to make some sense out of the world around us. Most importantly, by integrating this whole spectrum of senses, the developing child, as well as for the overtaxed adult may be able to connect to the world in new ways. Join us. Come to your senses!

We begin at 7:30 pm on the first night and end at 12:00 noon on the last day. Tuition for this session is \$500. Graduates receive Level II credit for this course.

To register, please contact sdiadmissions@earthlink.net or 518-695-6377.

A recommended reading list will be available upon registration.
